Fire exhibited minimal growth. Acreage was gained on the southern and eastern flanks. Fire behavior observed was creeping and smoldering with isolated spots of rank 3 along the perimeter. The fire received no precipitation. Late afternoon stage 2 cumulus cells with moderate downdrafts increased fire behavior along the perimeter. Decrease in acreage due to more accurate mapping. The fire remains in monitor status.

The fire was flown by aircraft 999FG. The fire was still active with winds pushing an open-flame area upslope directly into a previously burnt spot. Surrounding fuels are a mix of spruce and hardwoods, with a brush understory. The most active part of the fire is a portion backing down into the flats with a 200 to 300 yard perimeter adjacent to the lake shore. Currently the fire is not threatening allotments and shows no signs of crossing south of Currant Creek. The fire is pushing lots of smoke up the valley and away from Lake Clark. Plans for tomorrow are to mob two Park Service personnel who will set up a RAWs station and help with the continuation of monitoring the fire.
